

Katambora Rhodes Grass

ENVIROGRO® Katambora Rhodes (*Chloris gayana*) is a new, environmentally enhanced seed product developed by Southedge Seeds Pty Ltd to improve the quality and performance of Rhodes grasses in the United Arab Emirates.

Checklist

- ✓ **Fine-leaved, highly palatable grass species**
- ✓ **Highly tolerant to salinity**
- ✓ **Extremely high seed purity (>98%)**
- ✓ **Higher germination compared to raw seed**
- ✓ **Excellent storage capabilities**
- ✓ **Excellent flow characteristics for sowing**
- ✓ **Economical to freight**
- ✓ **Seeding Rates of 10-15kg/ha (10 Donums)**
- ✓ **Responds well to nitrogen fertiliser and irrigation**
- ✓ **Ideal for grass/hay production under irrigation**

ENVIROGRO® Katambora Rhodes grass is a superior line which has been produced in tropical northern Australia, mostly under irrigation, by professional Rhodes grass growers in areas ideally suited to Katambora Rhodes grass production.

The seed is of the best quality available, with extremely high purity and germination compared to standard Rhodes grass seed produced in dryland situations in other areas, in both Australia and overseas.

Tropical North Queensland is recognized as one of Australia's premier production areas available for reliable Rhodes grass seed production, using the very latest agronomic and irrigation techniques. This environment, combined with the benefits of seed enhancement,

ensures that the high quality and vigour of **ENVIROGRO®** Katambora seed will become a major force in Middle Eastern markets.

ENVIROGRO® Katambora seed is produced under a strict quality control regime, whereby the production crops are regularly inspected and monitored throughout the growing period. All harvesting, drying and grading is carried out by Southedge Seeds' fully trained and experienced staff, using the latest available machinery and techniques to ensure the end product is delivered to the client in the best possible condition.

ENVIROGRO™ Katambora Rhodes is only available through Southedge Seeds Pty Ltd. Australia.
